

EXHIBIT 60

Get started	1
Getting started with IBM Cloud Kubernetes Service	1
Understanding IBM Cloud Kubernetes Service	1
How to create a Kubernetes cluster in IBM Cloud Kubernetes Service	1
Use cases	2
Learning paths	2
Release notes	2
Tutorials	3
Tutorial: A blog for Kubernetes Service	3
Setting up your first cluster in your Virtual Private Cloud (VPC)	3
How to	4
Planning your Kubernetes environment	4
Preparing your account	4
Installing the CLI	4
Setting up the API	4
Creating clusters	4
Accessing clusters	4
Adding worker nodes	4
Managing the cluster and worker nodes	4
Setting up deployment	4
Enhancing security	4
Managing access control	4
Securing cluster workloads	4
Controlling network traffic in Cloud clusters	4
Controlling network traffic in VPC clusters	4
Adding static routes to worker nodes	4
Configuring the cluster DNS provider	4
Setting up the Kubernetes dashboard	4
Logging and monitoring	4
Setting up monitoring by	4
Configuring integration and delivery for deployment and development	4
Developing and deploying apps	4
Setting up service mesh with Istio	4
Exporting data	4
Preventing data leaks from running container nodes	4
Deploying the Syslog agent on Kubernetes nodes	4
Enabling the IBM Cloud Operator Cluster addon	4
Setting up block storage for Cloud	4
Setting up block storage for VPC	4
Setting up file storage for Cloud	4
Setting up file storage for VPC	4
Setting up object storage	4
Setting up Redis	4
Setting up and restoring storage data	4
IBM Cloud storage utilities	4
Enhancing cluster capabilities with integrations	4
Managing cluster costs	4
Managing performance	4
Monitoring clusters	4
